Trusted to take you **further.**

EQS Group is a global leader in AI-first software for compliance. More than 14,000 companies worldwide trust EQS Group to meet complex regulatory requirements, manage risks, and report transparently on business performance and their impact on society and the environment.

EQS Group's compliance & ethics solutions help organizations build trust, enable secure whistleblowing and manage cases, and address compliance risks. In addition, EQS Group provides software to govern the responsible use of AI, protect personal data, and manage privacy risks. Investor relations teams benefit from solutions that simplify regulatory disclosures and strengthen capital market communication. EQS Group's sustainability solutions support efficient ESG management and reporting.

Drawing on more than 25 years of domain expertise and longstanding customer relationships, EQS Group combines compliance-ready AI with intelligent workflows in a secure environment, to give practitioners more time to focus on complex assessments, meaningful remediation, and advising the business. **Q by EQS**, the agentic AI layer embedded in its compliance platform, enables AI-native intelligence with human oversight and accountability built in.

EQS Group was founded in Munich in 2000. Today, the group employs around 600 professionals worldwide. https://www.eqs.com/
