Welcome to EQS Compliance Cockpit! *This guide will walk you through each step to review the Approvals module and start receiving and managing disclosures.*

*This guide is written specifically for Convercent upgrade customers, with notes that explain how to achieve the functionality from Convercent in your new Compliance Cockpit. Throughout this document you will find links to the EQS knowledge base, where you will find more detailed resources that cover how to use the Approvals module.*

Click [here for the EQS knowledge base](#). See [Section 1.1](#) for more information about the knowledge base and how to register.

## ***How do I ensure continuity and make sure Approvals is live and ready for use?***

We have replicated your configuration from Convercent to the EQS Compliance Cockpit! Your top priority actions are listed in the “Going Live” section below – your focus is to activate your account, review the configurations, make one or two updates as indicated below, and start to get comfortable with the new interface.

To help you learn your new system in relation to Convercent, we have created a Learn More guide and a Glossary of Terms that includes a summary of the configurations that we have made for you. You’ll find those resources [here](#).

## ***What if I want to take this opportunity to update or change Approvals configuration?***

The document: [Getting Started Guide - Approvals Learn More](#) will walk you through the Approvals features with guidance on how to make updates.

# **1. Going Live**

**These are the required steps for activating your account and making sure everything is live.**

Upon go-live, your system was set up with one administrator user account.

To activate your user account, follow the steps below carefully.

**▶ Please note - the activation email expires after 72 hours and will need to be re-sent if you do not activate your account before then.**

Because account activation is such a critical part of the upgrade, we have created a video that goes over all of the steps. [Click here to watch the video](#).

You will receive an activation email with the subject “Welcome to EQS Compliance COCKPIT!” **This email is valid for 72 hours.**

After 72 hours, contact your **EQS Compliance COCKPIT** administrator for a new activation email.

» **Note - If you are the very first user at your company for Compliance Cockpit, contact EQS Support for help resending the activating email.**

01. Click the link in the email.
02. Set your password.
  - a. Log into *EQS Compliance COCKPIT*

» **Note - for customers going live with EQS Approvals and EQS Integrity Line: After setting your password, you must log in right away to finish activating your account by saving your Recovery Key.**

03. You can find the correct link to *EQS Compliance COCKPIT* in your activation email or in any notification email.
04. Download your Recovery Key

If you are Going Live with EQS Approvals **and** EQS Integrity Line, you will be prompted to download a recovery key.

If you are Going Live with EQS Approvals **only**, you will not be prompted to download a recovery key and references to recovery key in the remainder of this document should be ignored.

» **CRITICAL - If prompted, DO NOT SKIP THIS STEP - Losing access to your Integrity Line account without a recovery method in place will result in permanent data loss. The system does not allow EQS Support to trigger a password reset, making it impossible for our team to recover a locked account.**

- a. When you log in for the first time, you will see this pop-up:

### Recovery Key

If you forget your password, you can use the Recovery Key to regain access to Integrity Line.

Please download and print the Recovery Key and store the paper in a safe and secure place where no one else can easily access it. Keep the Password Recovery Key separate from your other login details. Don't forget to securely delete the electronic copy of the Password Recovery Key from your device after you have downloaded and printed it.

[Download Recovery Key](#)

I am aware that the data is irrevocably lost if I forget my password, do not have the Recovery Key and no other Compliance COCKPIT user with administration permissions has access to the system.

[Confirm download](#)

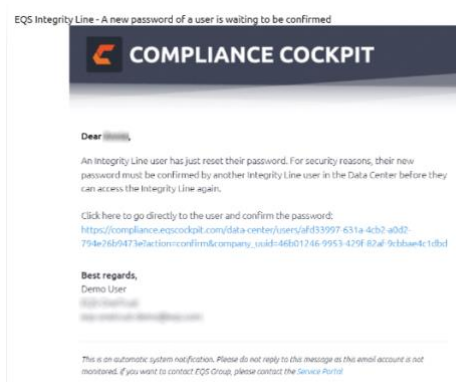

- b. The recovery key is an additional layer of security for *EQS Compliance COCKPIT* accounts. During account activation, you must download and save a **Recovery Key**. This is the only way to reset your password if you lose access. Store it in a secure location.

**Important - Before confirming download, you will be required to acknowledge that if you lose both your password and the Recovery Key, your data is irreversibly lost. There is no backup, no reset option, and no way for Support to help.**

## Password Recovery

This application **does not** support password recovery methods such as security questions or Support-assisted password resets. Instead, there are only two ways to recover access:

01. **Recovery Key File** – During account activation, you must download and save a **Recovery Key**. This is the only way to reset your password if you lose access. Store it in a secure location. **Another Active Admin User** – If there is a second Compliance COCKPIT user with access to the Data Center in your system, they can assist you in resetting your password. When you request a password reset, the second user will get an email like the one below, and they can click through to approve the password reset.

Now that you have activated your account, bookmark <https://compliance.egscockpit.com/> or <https://compliancecockpit.us/> for easy access to the Compliance Cockpit.

## 1.1. Register for the Knowledge Base and Support Resources

01. You will find our full knowledge base at <https://support-center.egs.com/s/c-e-overview>.
02. Register for an account by submitting your email and creating a password.
- a. Register here: <https://support-center.egs.com/s/login/SelfRegister>.

**Note - This is a separate log-in from your Compliance Cockpit username and password.**

03. Support Queries are submitted through HelpDesk as well.
04. **Bookmark the URL** so that you can easily access the knowledge base and reach out to Support when needed!

## 1.2. Create additional Approvals administrators

In Convercent, Approvals access permissions were determined by two settings – User Account Permissions and Notification Profiles. In *EQS Compliance COCKPIT*, access to Approvals is managed through comprehensive role assignments in the **Roles & permissions** tab.

01. Within *EQS Compliance COCKPIT*, find the top-left navigation menu and click on ‘**Data Center.**’
02. Select the ‘**Roles & Permissions**’ tab to view the roles available in your account. We have already configured user roles that mirror your set-up in Convercent. Some examples of roles are seen here:’

Convercent Permission	EQS Compliance Cockpit Role	Type
Organization		
Organization Setup		
Human Resources	Admin	Standard
System Administration		
Disclosure Management		
Admin	Approvals Admin	Custom
Moderator	Approvals Moderator	Custom
Participant	Employee	Standard
IT Setup		
	IT Setup	Custom

- a. Standard *EQS Compliance COCKPIT* roles are out-of-the-box roles.
  - b. Visit the [Knowledge Base](#) for more information on using User Roles and updating and creating custom user roles.
03. **Create Users:** Within Data Center you can create users by clicking ‘**Create**’ or ‘**Import users**’ in the top right corner. **Make sure to assign them the correct user role in the Active Roles field.**

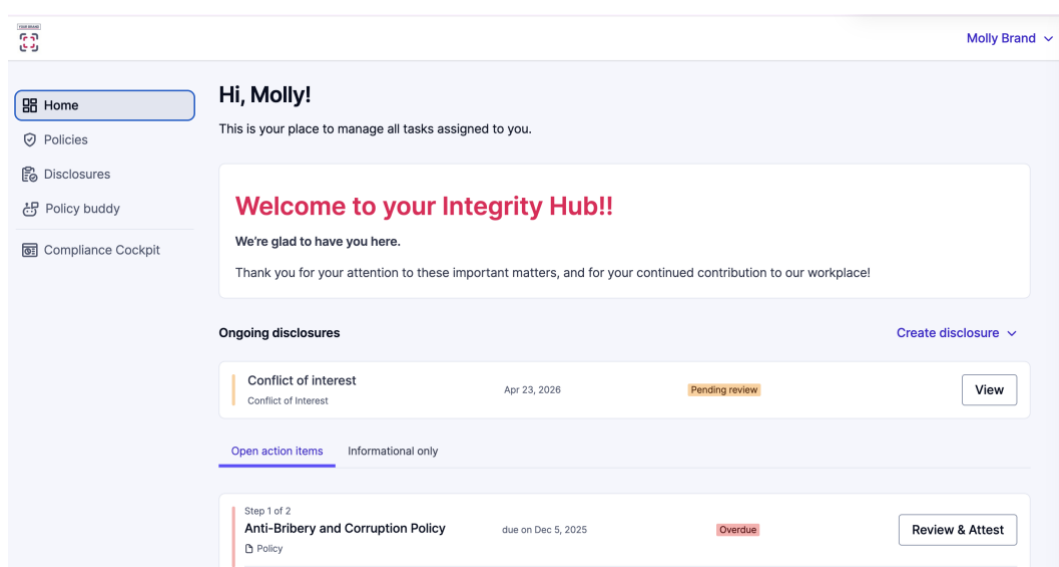

For more information on adding users review the “Manually Create and Update Users” article in the [Knowledge Base](#).

## 1.3. Accessing EQS Integrity Hub

The EQS Integrity Hub is where employees will submit disclosures. You can access the EQS Integrity Hub typing this web address into your browser address bar: <https://www.integrityhub.net> or <https://www.integrityhub.us/>

For convenience, you should add this to your browser favorites.

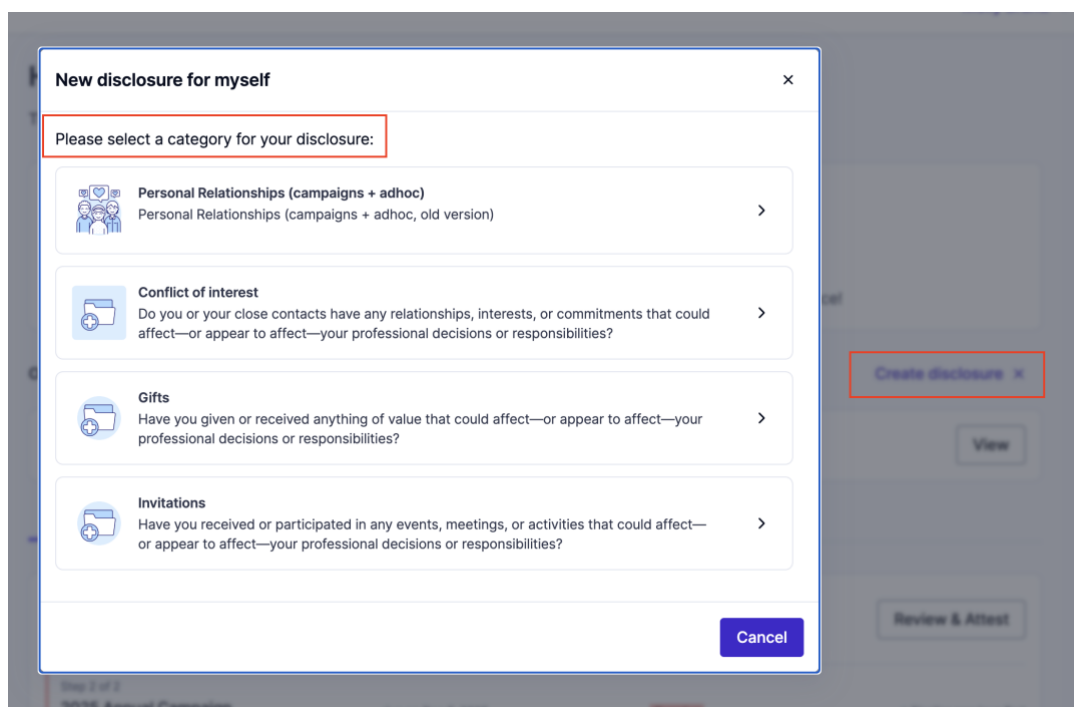

01. Once launched you will land on the home page where you can view the custom welcome message and the last six Disclosures.
02. Select the **'Disclosures'** option in the left-side menu to view all your Disclosures.

If you require changes to the branding or configuration of the EQS Compliance COCKPIT, reach out to Support.

## 1.4. How do disclosures get submitted?

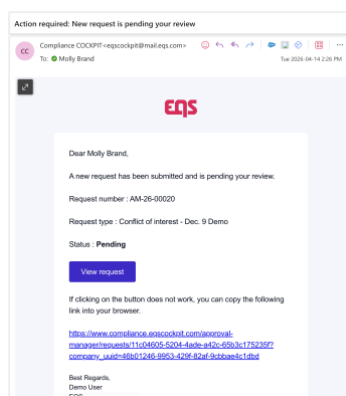

01. Disclosures are submitted via *EQS Integrity Hub*. Employees will use the **'Create disclosure'** button to create and submit disclosures, or they will respond to assigned action items that will appear on their home page.

02. As you learn the new platform, you can submit test disclosures to see how they appear in Integrity Hub and in Compliance Cockpit. You can delete test disclosures from Compliance Cockpit so that they will not impact reporting and dashboards.

## 1.5. Reviewing and Approving Disclosures

01. Approval administrators can review disclosures in EQS Compliance Cockpit. Approval administrators will be notified via email when they have new disclosures to review.
02. Please refer to the **Notifications Profile** section to learn more about how EQS Approvals rules indicate who get notified when new disclosures are submitted.
03. Click the **'View Disclosure'** button to launch EQS Compliance Cockpit to review the disclosure.

04. Alternatively, you can access EQS Compliance Cockpit directly via <https://compliance.eqscockpit.com> or <https://compliancecockpit.us/>
05. Select '**Approvals**' from the hamburger menu in the top left corner to view the list of disclosures.

The screenshot shows the 'Approvals' dashboard with a table of disclosures. The table has columns for Disclosure, Employee, Status, Supervisor, Assigned to, Submission date, Country, Department, Business unit, and Converted value.

Disclosure	Employee	Status	Supervisor	Assigned to	Submission date	Country	Department	Business unit	Converted value
Invitations : issued by the bu... AM-26-00339	Emma Bobbins	Pending	Emma Bobbins	Default Approvers	22/04/2026	United Kingdom	Customer Success	Customer Success	EUR 230.14
Invitations : issued by me to ... AM-26-00338	Emma Bobbins	Pending	Craig Elkins	Default Approvers	22/04/2026	United Kingdom	Compliance	Compliance	EUR 998.00
Personal Relationships (cam... AM-26-00337	Emma Bobbins	Approved	Craig Elkins	Default Approvers	03/02/2026	United Kingdom	Compliance	Compliance	
Personal Relationships (cam... AM-26-00336	Leah LaCombe	Pending	Kelly Dziedzic	Anthea Gerberg, Megan Farrell	21/04/2026	Costa Rica	Customer Success	Customer Success	
Gifts : Received AM-26-00335	Craig Elkins	Approved		Supervisor	20/04/2026	United States	Legal	Compliance	EUR 8.49
Invitations : issued by the bu... AM-26-00334	Craig Elkins	Approved		Default Approvers	20/04/2026	United States	Legal	Compliance	EUR 254.75
Invitations : issued by the bu... AM-26-00333	Craig Elkins	Pending		Supervisor	20/04/2026	United States	Legal	Compliance	EUR 254.75
Conflict of interest AM-26-00332	Megan Farrell	Approved with conditions	Jeffery Jeffersen	Global Compliance	13/04/2026	Sweden	Procurement	Strategic Sourcing	
Conflict of interest	Leah		Kelly						

06. Click into a disclosure to begin your review. The **Disclosure** tab shows the information about the respondent at the top of the screen and their responses to the disclosure form toward the bottom. Learn more about reviewing disclosures [here](#). The **Related** tab will show any disclosures submitted by the same person, the **History** tab shows the audit log for the disclosure, and the **Messages** tab is where you can communicate with the disclosing party as needed.

The screenshot shows the detailed view of a disclosure. At the top, it identifies the employee as Eddy O'Mara and lists his roles: Compliance, Research and Development, and Ireland. The disclosure is currently in a 'Pending' state.

**Disclosure outcome:**

Outcome date	Outcome by	Attestation status	Attestation date
Not yet decided	Not yet assigned	Attestation not applied	-

**Disclosure details:**

**Conflict of interest**

Give your conflict of interest a short name.  
External working

What type of conflict of interest would you like to declare?  
Outside employment

Describe your conflict of interest

**Progress:**

- Approval: Reviewed Supervisor
- Approval: Reviewed Supervisor
- Approval: Reviewed Global Compliance
- Additional approval: Reviewing Forwarded to additional approvers

07. Press the purple **Review Disclosure** button in the top right corner to select a decision for this Disclosure, then click **Confirm** to finalize. If you have a multi-step review process, your decision will trigger a notification to the next person in the review process.

**Review disclosure** [X]

You have chosen to complete the disclosure. Please specify how you would like to proceed:

Decision

Select decision [X]

**Acknowledge**  
Log disclosure without formal approval. Recommended for conflict of interest (COI) cases with low risk (e.g., minor personal connection).

**Approve with conditions**  
Log disclosure with safeguards. Recommended for disclosures needing mitigation (e.g., donate gift, avoid selection involvement).

**Approve**  
Formally approve the disclosure. Recommended for gifts/invitations when the company accepts responsibility (e.g., business dinner, client event).

Drop your file here, or [browse](#)  
Maximum file size: 50 MB

Share this decision and any attached documents with the employee.

Cancel [Confirm]

- a. At the final stage in the review process, the reviewer can require the employee to attest to conditions, and they can choose to share the decision with the employee. Use the checkboxes to enable those options before finalizing the decision:

**Review disclosure** [X]

You have chosen to complete the disclosure. Please specify how you would like to proceed:

Decision

Approve with conditions [v]

Require employee to attest to the outcome

Decision message

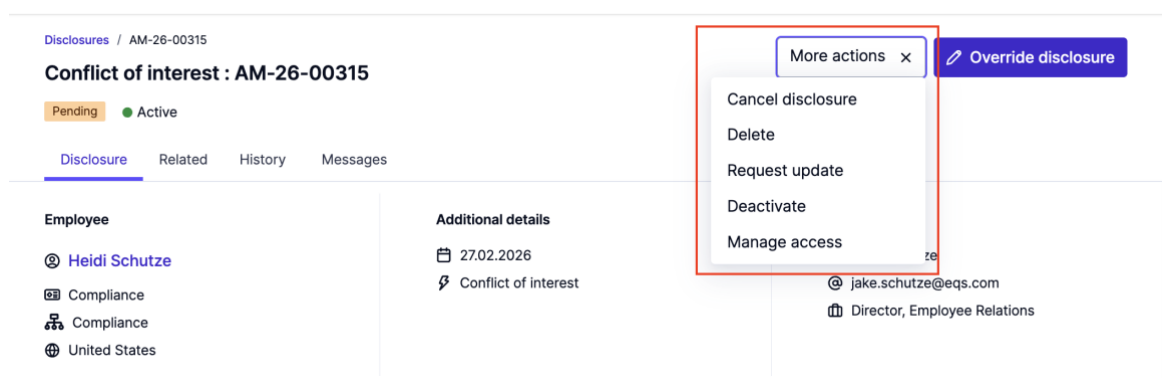

Thank you for submitting your conflict of interest. Please provide an update if anything changes.

Drop your file here, or [browse](#)  
Maximum file size: 50 MB

Share this decision and any attached documents with the employee.

Cancel [Approve with conditions and close]

08. During or after the review process, you can click **'More Actions'** in the top-right corner of the screen to access additional administrator actions. You can cancel or delete a disclosure if needed, or you can request an update from the disclosing party. Additionally, you can deactivate a disclosure that is no longer needed, and you can click **'Manage access'** to view the list of users who have access to the disclosure and add or remove people as needed.

## 1.6. Notification Profiles

Convercent Disclosures used Notification Profiles to assign submitted disclosures to specific reviewers based on information such as the employee's location or the type of disclosure. In EQS, this routing is achieved via the Approvals Rules Engine.

Convercent notification profiles have been converted to EQS Approval Rules during the migration process.

Visit the [Knowledge Base](#) to find a full manual on the Approvals Rules Engine.

## 1.7. Submit internal requests for IT and other internal updates

### 1.7.1. Single Sign-On (SSO)

01. If your Convercent account uses single sign-on, you can enable it in *EQS Compliance COCKPIT* as well.

**Note - If multifactor authentication was requested for your EQS Compliance COCKPIT configuration, SSO cannot be enabled. You can skip this step in the guide.**

02. To enable SSO, follow these steps:

- a. Create a user account for IT with the active role: **IT Setup**

**Note - This user's access will be restricted to EQS Compliance COCKPIT Global settings only and not allow access to confidential data.**

- b. IT: Log into *EQS Compliance COCKPIT*.
- c. IT: Click the **'gear icon'** in the top right to open the settings sidebar.
- d. IT: Click on **'SSO Configuration.'**
- e. IT: Download the SSO manual as needed and provide it to your internal IT user to configure SSO.

## 1.7.2. Data Sync

To interact with EQS Integrity Hub all users must have an active account. System administrators must provision (create) all user accounts to allow interaction with EQS Integrity Hub. It is not practical for system administrators to create and update these accounts manually. EQS has provided three options to achieve bulk user provisioning:

### 1.7.2.1. Spreadsheet import

This method does not require IT Professionals and can be performed by *EQS Compliance Cockpit* administrators with sufficient access. This is a manual task and should be performed on a regular basis.

01. In *EQS Compliance Cockpit* select **'Data Center'** from the left-hand menu
02. Select **'Import Users'**
03. Follow the Import users Instructions on the pop-up modal screen

Visit the [Knowledge Base](#) to find a full manual on the importing and updating users.

### 1.7.2.2. SCIM

01. From the **'gear icon'** (top right)
02. Select **'DataSync Configuration'**
03. Download the EQS DataSync User Manual.pdf
04. Pass on to your IT Professional who has been previously granted access with the IT Setup role.

### 1.7.2.3. SFTP

SFTP is the most common method for provisioning user accounts in Convercent. EQS supports SFTP with a major difference.

**SFTP sites are hosted by the customer not by EQS.**

Please consult EQS SFTP User Manual.pdf for further information.

## 1.8. You're Live!
